National Register of Historic Places Evaluation:

This Warren pony truss swing bridge has significance as an example of a movable bridge and as a subtype. Its significance is demonstrated by the presence of distinctive engineering and design features of a pony truss swing bridge, which is characterized by the Warren truss configuration, center-bearing turning mechanism, pivot pier, and operator's house. The bridge exhibits alterations to the operator's house that result in a minor loss of integrity, but continues to convey significant design features of this subtype. The bridge is eligible for listing in the National Register under Criterion C: Design/Engineering.

No evidence was found during research or data collection activities to indicate that this bridge possesses a direct and important association with historical events or trends. This bridge does not possess significance under Criterion A.
