### Physical Components

<i>Type</i>	Concrete earth filled arch
<i>Spans</i>	1
<i>Dimensions</i>	Length 18.3 m Width 8.1 m
<i>Load Limit</i>	None posted

### Descriptive details

This bridge, also named Schneider Creek, lies less than 100 metres to the west of the first bridge. It also looks identical to the first bridge including the recently re-plastered facade. The only difference is that this creek has been directed by a carefully constructed concrete path. This structure is a single lane bridge, covered with a minimum of 300 mm of fill.
