NOTES.

All materials and workmanship shall be in accordance with P.D.H. Form 408/60, Form 409/45, Division 10 Highway Lighting Specifications dated February 15, 1960 and Standard Specifications for Highway and Railway Bridges.

The electrical installation shall conform to requirements of the National Electrical Code and shall comply with all local municipal laws and ordinances relating to electrical installations, and requirements of any local laws and ordinances, and Special Provisions.

Structural steel shall conform to ASTM A36 designation, except as noted.

The contractor shall verify in the field all dimensions of the existing structure shown on design drawings before proceeding with the work.

The existing structure shown in dotted (- - -) lines.

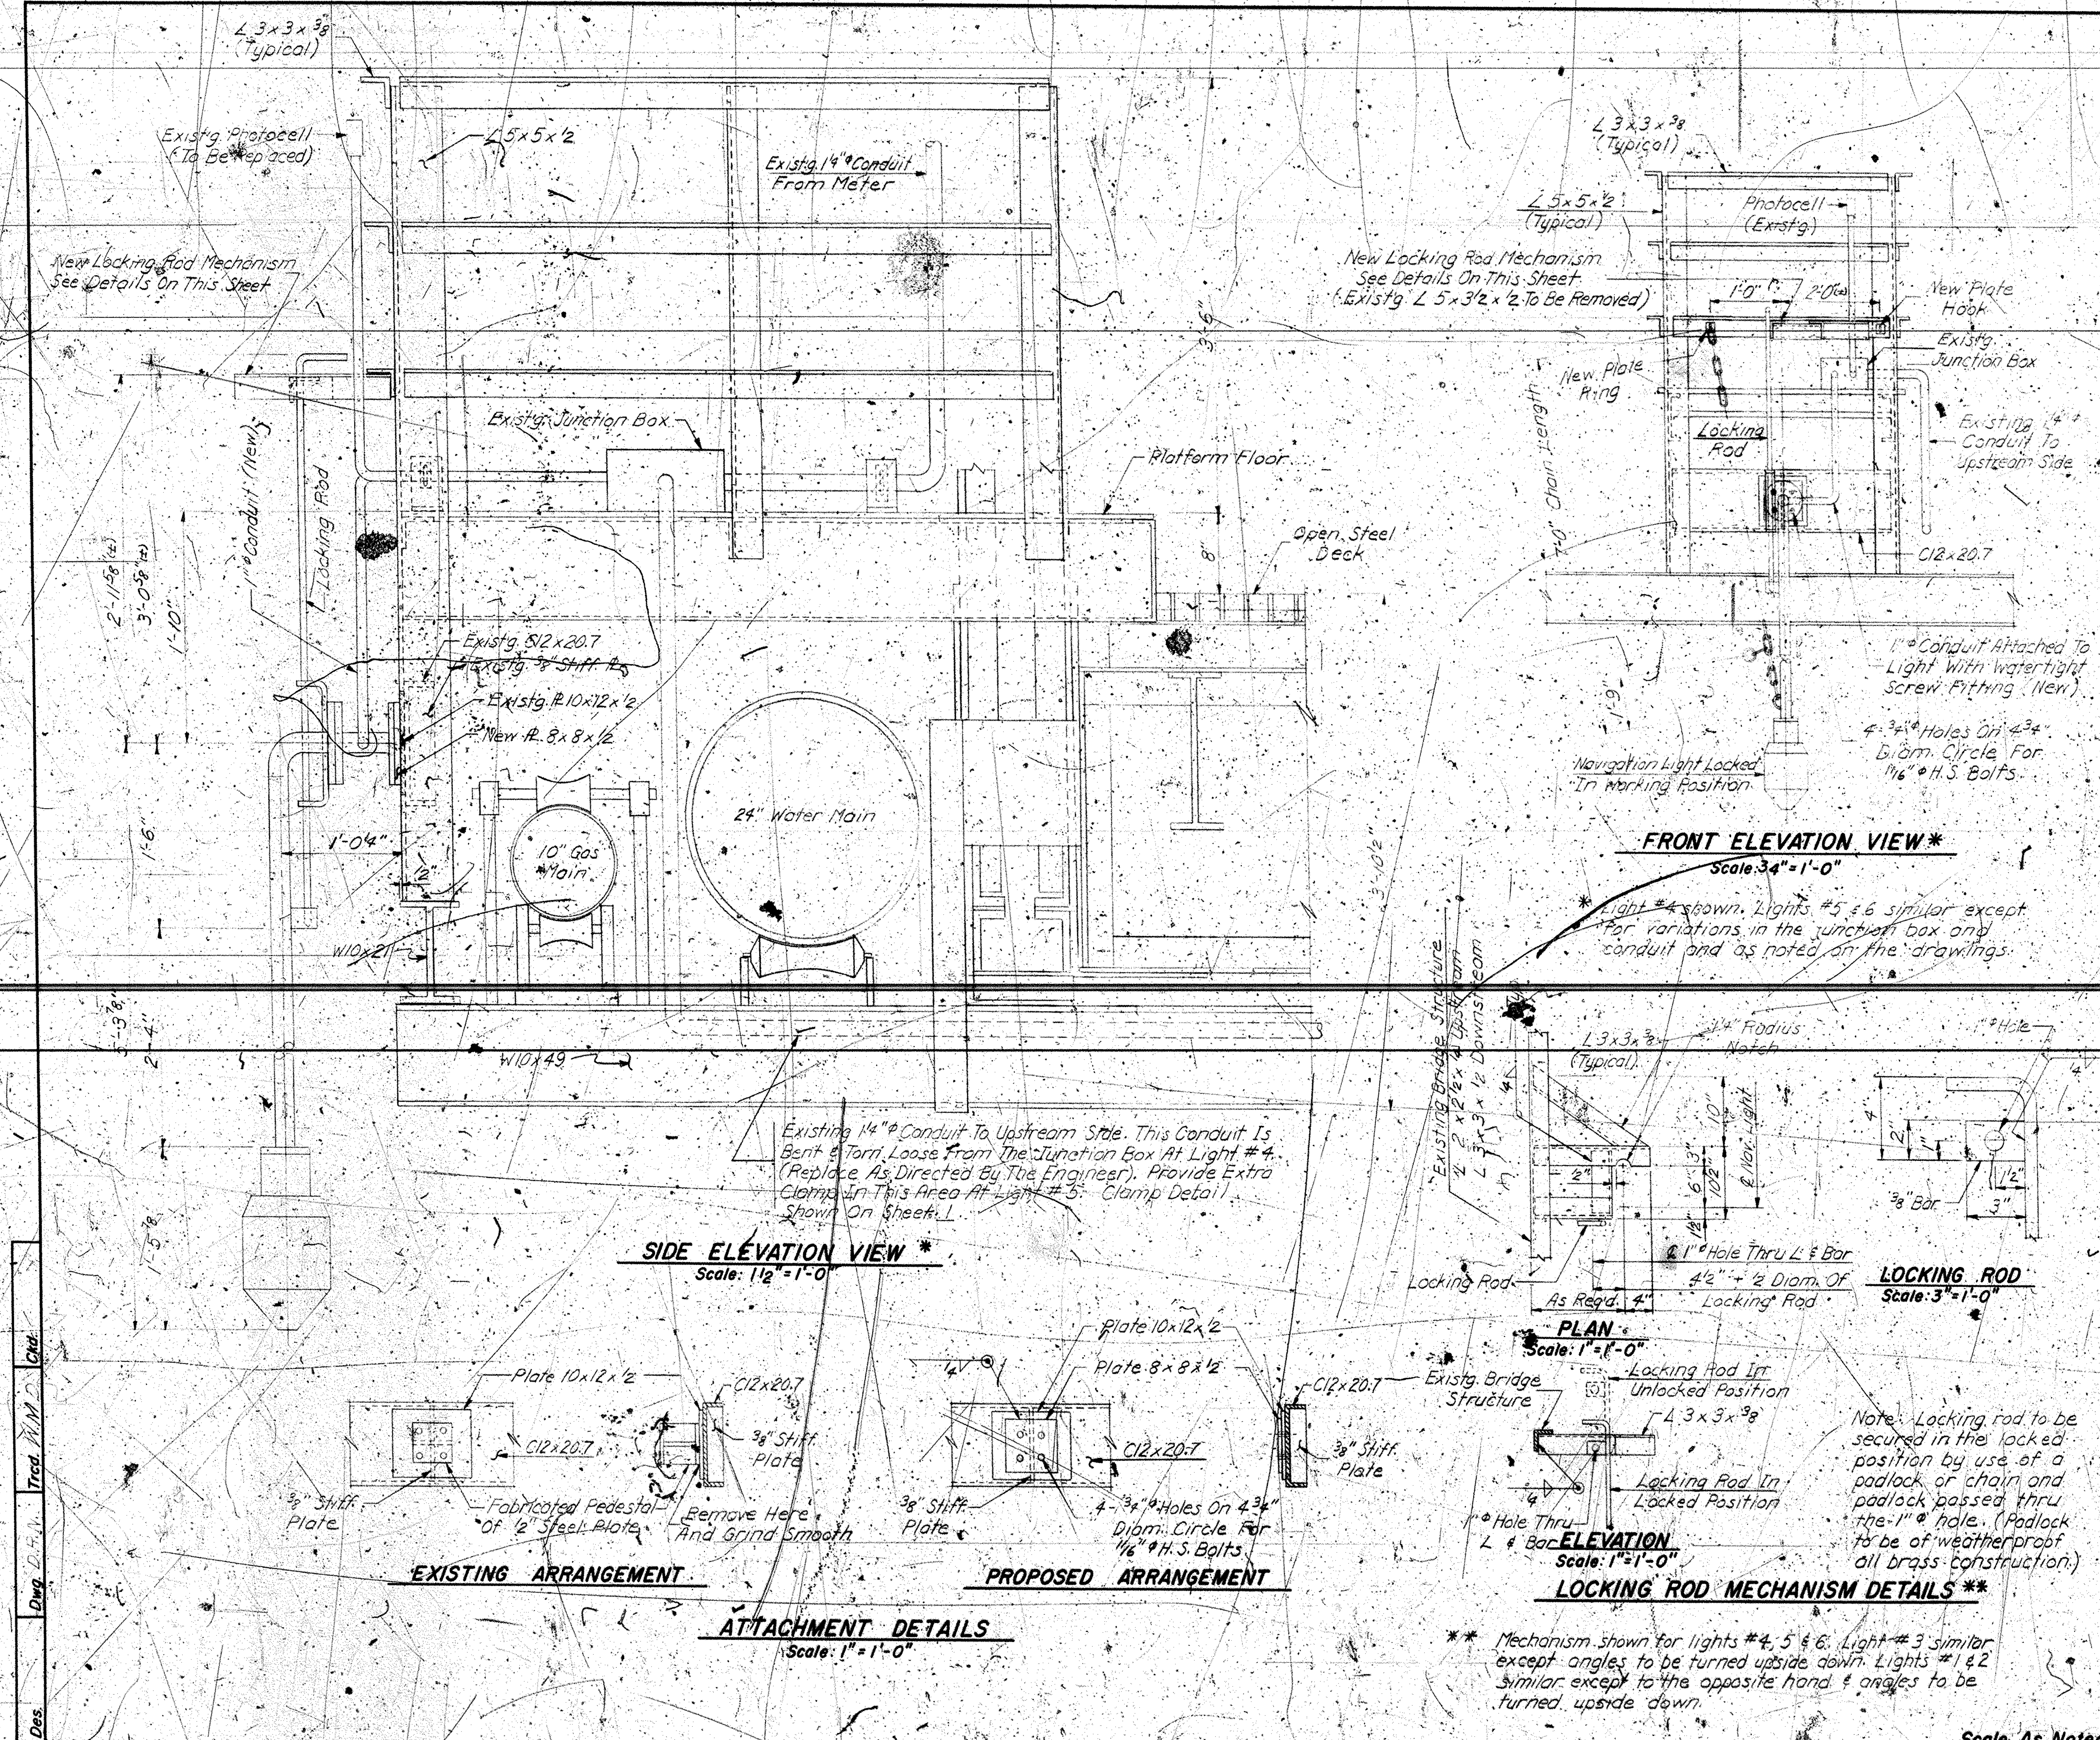
BARCLAY BROTHERS, INC. #4101-B

DESIGNED BY DISTRICT 3-0 BRIDGE UNIT



GENERAL NOTES

- Materials and workmanship shall be in accordance with Specifications Forms 408/73, 409/73, & Spec. Provisions.
- The electrical installation shall conform to requirements of the National Electrical Code and shall comply with all local municipal laws and ordinances applying to electrical installations, and requirements of any local laws and ordinances applying to electrical installations and attached Special Provisions.
- Structural steel shall conform to ASTM-A36 Designation except where noted otherwise.
- The contractor shall verify in the field all dimensions of the existing structure shown on design drawings before proceeding with the work.
- Navigation Lights shall be provided as follows: Red lights visible for 180°, 12 volts, 16 candlepower, 8 watt lamps, (Pennwalt Part No. FP-1620 or approved equal). Green lights visible for 360°, 12 volts, 4 candlepower, 8 watt lamps, (Pennwalt Part No. FP-1620 or approved equal).
- Extreme care shall be exercised when welding near gas pipe. Contractor shall inform the gas company of welding time and duration.
- All new structural steel and any areas damaged by welding shall be treated and painted in accordance with Form 409, except finish coat shall match the existing structure.
- Electrodes shall be of the low hydrogen type conforming to AWS Classification E7016, E7018 or E7028. Tack welds shall be made with the same type of electrode as the final weld.
- No welding will be allowed when surfaces are wet or exposed to rain, snow or wind or when welders are exposed to inclement conditions that will hamper good workmanship. Any moisture from fog, dew etc. present at the point of welding, shall be driven off by heat before welding commences. Windbreaks shall be required to protect working areas from direct wind.
- Surfaces of existing metal which are to be covered by new material shall be cleaned of dirt, rust and other foreign matter except adherent paint film. The portions of such surfaces that are to receive welds shall be cleaned thoroughly of all foreign matter, including paint film, for a distance of two inches from each side of the outside lines of welds.
- Parts of the lighting system where paint has peeled off shall be repainted as directed by the engineer.
- All hardware & existing Navigation Lights to be removed shall be as called for on these plans and as directed by the Engineer. Such removed hardware & Lights shall be the property of the contractor.

GENERAL NOTES

- All Materials and Workmanship shall be in accordance with the Pa. Dept. of Transportation Specifications Publication 408/82 and the Special Provisions.
- Design Specifications: Design Division of 1983 A.A.S.H.T.O. "Standard Specifications for Highway Bridges" and as supplemented by the Design Manual, Part 4, Structures. (Including 6-83 Revisions).
- Live Loads: H20, HS20, and ML80 Loading.
- Any portion of the Existing structure not specified for Removal, which is damaged by the Contractor shall be replaced in Kind at his expense to the Department.
- The Engineer reserves the right to change the nature and limits of the work to assure a satisfactory repair.
- All existing concrete that is to come in contact with new concrete shall be coated with Epoxy Bonding Compound just prior to placing the new concrete. The existing concrete shall be thoroughly blast cleaned prior to the application of the Epoxy. The cost of cleaning and Epoxy Application shall be incidental to the repair item to which it is applied. The Epoxy Resin Bonding Compound shall be Type II, Grade E, as described in ASTM C881-78.
- The existing Reinforcement bars shall be cleaned to remove any rust, dirt or foreign material prior to pouring new concrete.
- New Steel ASTM-A36, & H.S. bolts ASTM-A325.
- All dimensions shall be verified in the field by the Contractor before the start of construction.
- All materials and equipment used for jacking are incidental to Item for Clean and Reset Truss Bearings. For Jacking Details, See Sheet 4.
- Surfaces of existing metal which are to be covered by new material shall be cleaned of dirt, rust and other foreign matter except adherent paint film. The portions of such surfaces that are to receive welds shall be cleaned thoroughly of all foreign matter including paint film for a distance of two inches from each side of the outside lines of weld.

⚠ = Includes Approx. 300 S.F. on Near Abut. Face & Bearing Areas and Approx. [illegible] on Far Abut. Face & Bearing Areas.

GENERAL NOTES

The Hydrographs on this sheet were plotted from records of mean daily flow for Lycoming Creek near Trout Run, Pennsylvania, published by the U.S. Geological Survey
The discharges were increased by the ratio to the .8 power of the drainage area relationship
Drainage Area at Trout Run - 173 Sq Miles
Drainage Area at 4th Street Bridge - 269.2 Sq Miles

GENERAL NOTES

Figures underlined indicate item numbers in Bill of Material
Bill of Material includes only principal items of equipment
Braze all ground wires to structure steel and to terminal lugs for connections to equipment frames
Where conduit was run exposed it was adequately supported with hangers spaced not more than 8 Ft. on centers, or less than one hanger per conduit
All conduits are ¾" unless otherwise noted.
Conductors are copper
All conductors are #12 unless otherwise noted.
